8、 Dimension of machine: 12000mmX2000mmX900mm

10、 Drive system: chain drive, 7.5KW main motor power, working speed:3-15m/min;

11、 Welding structure: material of fixed beam and walking beam: hot-rolled steel, the base and rack are be gantry planer processing after welded, work platform is not

allowed stress deformation; main machine table-board's plainness < 2mm/1000mm

12、 parts: Slide: imported from Japan; bearing: Zhonghang Brand of Harbin

Working flow

decoiler → level device → hydraulic cutting → main roll forming machine → run out table

Parts of machine

name	quantity (set)
decoiler	1set
Level device	1set
Hydraulic cutting machine	1set
Main roll forming machine	1set
Run out table	2 sets
Control panel	1set

B TRANSPORTATION

All goods will be shipped to your country, containers number will be decided with how many machines would you choose

C. Installation of the machine

The individual components of the machine are installed according to the layout and prepared for the commissioning.

The installation comprises of:

- Installation by Suhang service technicians.
- The following services are included:
- Installation of the machine components.
- Adjustment of the machine components.
- Connection of all motors to the control cabinet.
- Installation of the required safety devices.

Delivery extent does not comprise of:

- Media supply (electrics, compressed air, etc.)to the machine(control cabinet)

- Raw material, process material and fuels
- Raw material for test blocks
- Transport and lifting devices
- Auxiliary staff.

The operators of the plant should be present during the installation in order to become familiar with the new machines.

D. Commissioning of the machine

The components of the machine are commissioned one after the other. At the end of the commissioning the machine is ready for production and is handed over.

The commissioning comprises:

- Commissioning by Suhang service technicians
- Training at the machine
- The following services are rendered
- Run up of the machine components
- Testing of all functions of the machine components
- Start of a fully automatic molding process
- Execution of machine acceptance

Delivery extent does not comprise of:

- Raw materials, process materials and consumables
- Raw material for test blocks
- Transport and lifting devices

The operators of the plant should be present during the commissioning in order to become familiar with the new machines.

E. Our After-Sales Service Commitments

Suhang hereby solemnly promises: We implement the “three guarantees” service policy for any equipments sold by Suhang, provide free of charge installation guidelines, commissioning and maintenance of the equipments, training of the Buyer’s relevant Operators; and provide technical requirements for the installation and operation of the equipments, technical layout diagrams and other related information, provide a lifetime supply of maintenance and spare parts

The detailed measures are as follows:

1.Guidelines for installation and commissioning of equipments:

Based on the actual situation, to assist and guide the Buyer and Buyer’s technical personnel in the overall installation location, the installation of equipments, and provide Buyer with answers to their questions and related issues;

2.Provide training for operation and maintenance personnel:

Based on the Buyer’s request, Suhang will provide free of charge training of the operation and maintenance personnel;

a) The User (Buyer) can send their operation and maintenance personnel to our factory for learning and training;

b) When Suhang is doing the installation and test running of the equipments for the Buyer, the Buyer can send their personnel to participate.

3.If failure occurs in any of the machines during the “three guarantees” period(one year), then, upon the Buyer’s request, Suhang will eliminate the failure;
